

FLAT PANEL ADHESIVE REMOVAL TOOL INSTRUCTIONS

Model: AMPRT

AMP01 Adhesive Mounting pad as installed to TV base.

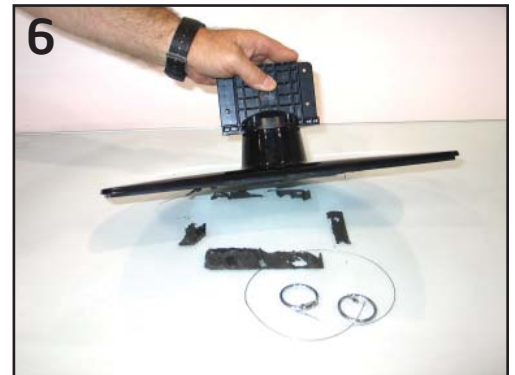

TV base as adhered to surface media. Glass surface as shown.

Place fingers in rings. Slide cutting cable between surface of table top and TV base. Create tension on the cutting cable.

Using a sawing motion with cutting cable pulled tightly. Saw back and forth, you will begin cutting thru the Adhesive Pad in seconds.

Cutting process complete. TV base will be easily removed from table top surface.

Using your finger, rub firmly to remove any foam / adhesive residue.

This process should only take a few minutes in many instances no removal chemicals will be required

Repeat same process to remove foam / adhesive from TV base.
